

# Welcome Chameleon Snow Leopard!

I am using Mac OS X Snow Leopard (**10A432**) for the demonstration of all proceed.

## — IMPORTANT —

Follow every steps in that Video before proceed

**Click on the image to see the video**

\*\*\*\*\* Post Installation \*\*\*\*\*

**Boot to the USB Installer**

**LEGACY BOOT :**

P0: Crucial\_CT275MX300SSD1

CD/DVD/CD-RW Drive

**USB Storage Device** ←

P1: WDC\_WDS250G1B0A-00H9H0

A0S0 KINGSTON SUV400S37240G

A0S1 KINGSTON SU300S37A240G

**UEFI BOOT :**

Windows Boot Manager

clover

UEFI: INT13(SATA,0x81)

**OTHER OPTIONS:**

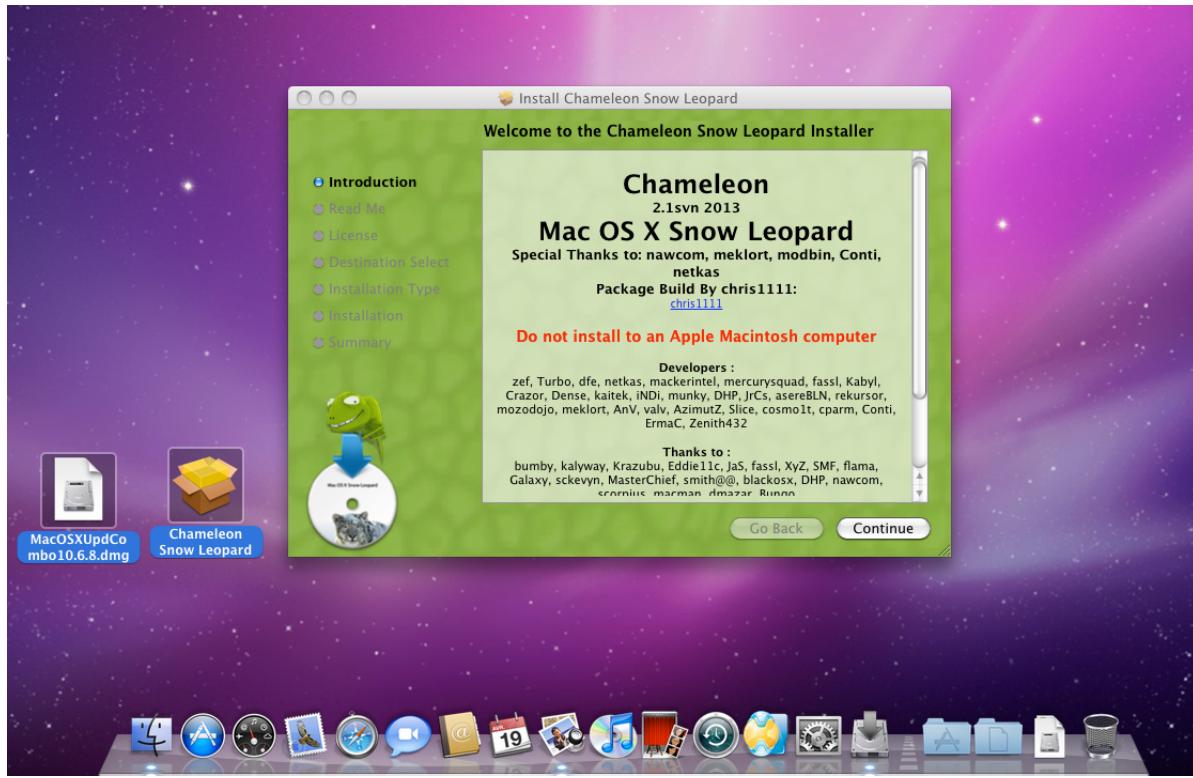

BIOS Setup

Diagnostics

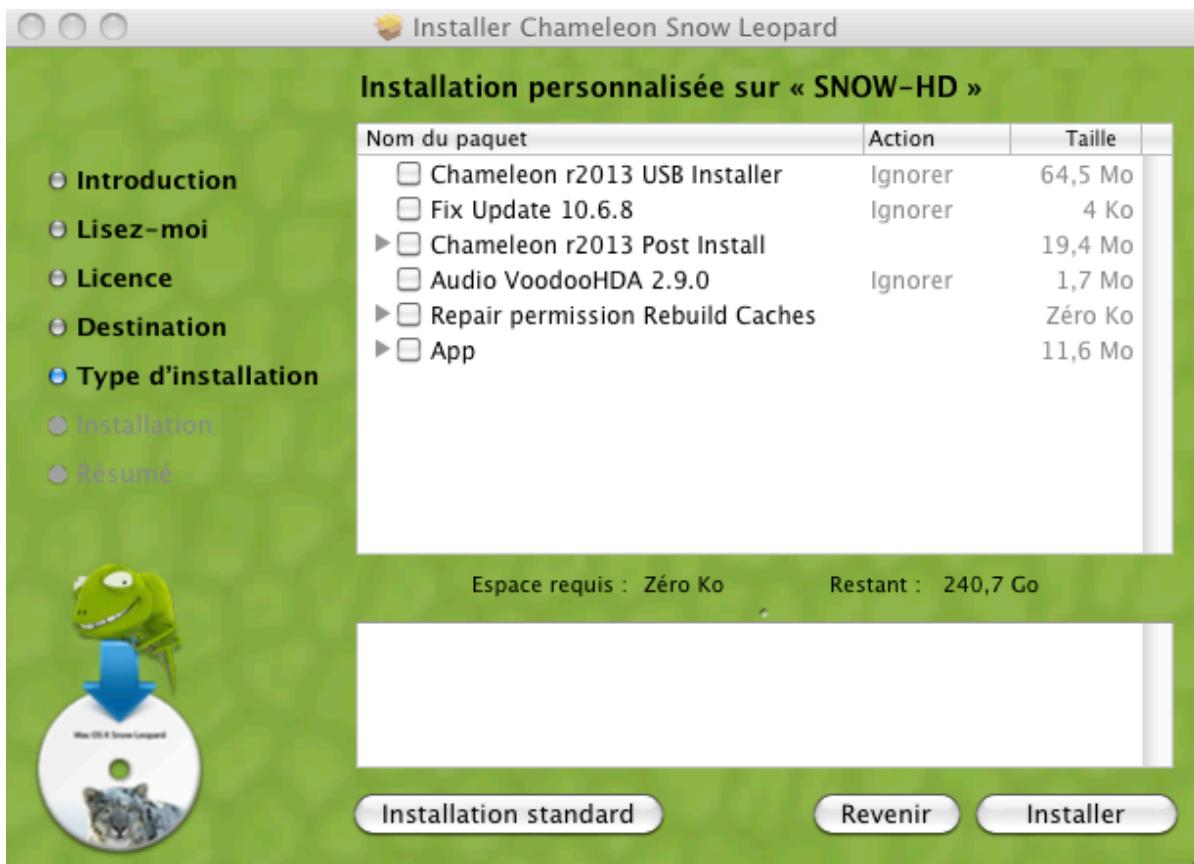

## Boot in the Mac OS Installer

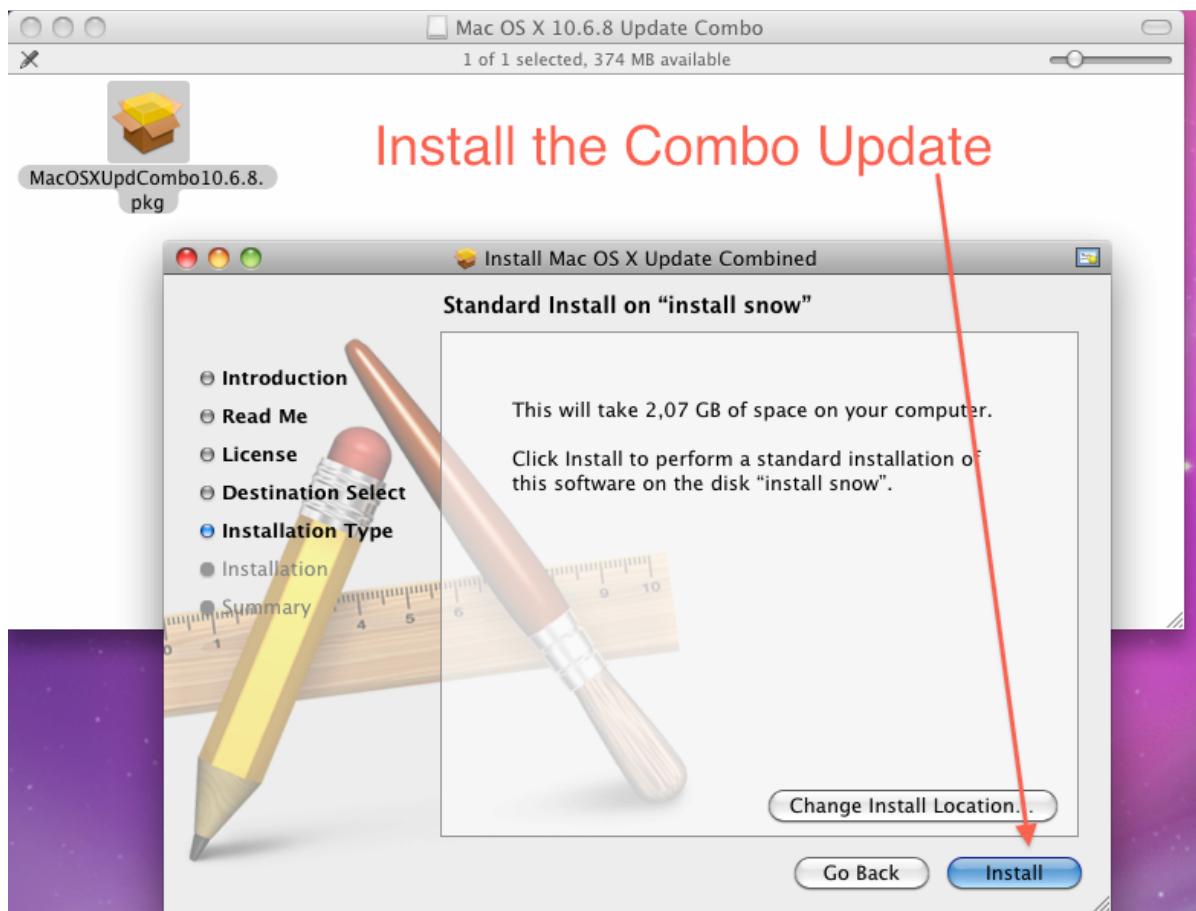

## Your on Mac OS X Snow Leopard Desktop

**If you have Sandy Bridge CPU do this step before  
installing Combo Update.  
You have to reboot again with the USB and continuing  
the steps  
( If this is not the case, you can skip this step )**

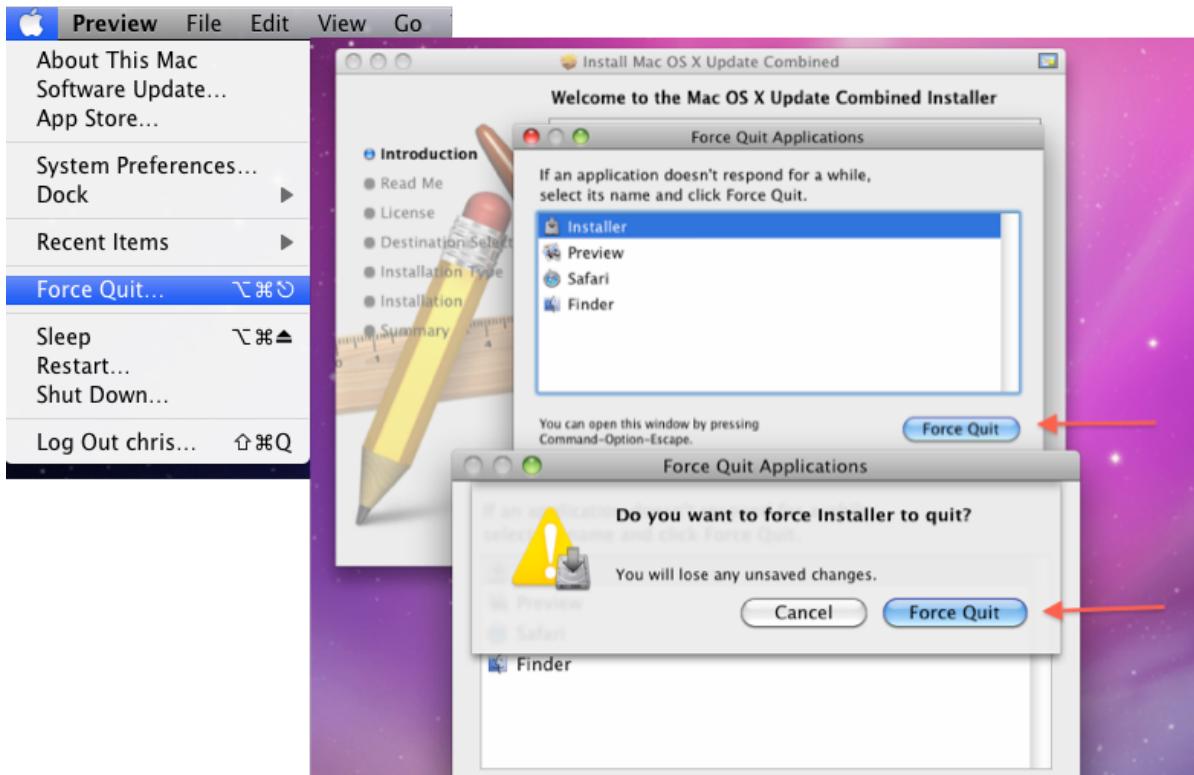

## Install Combo Update 10.6.8

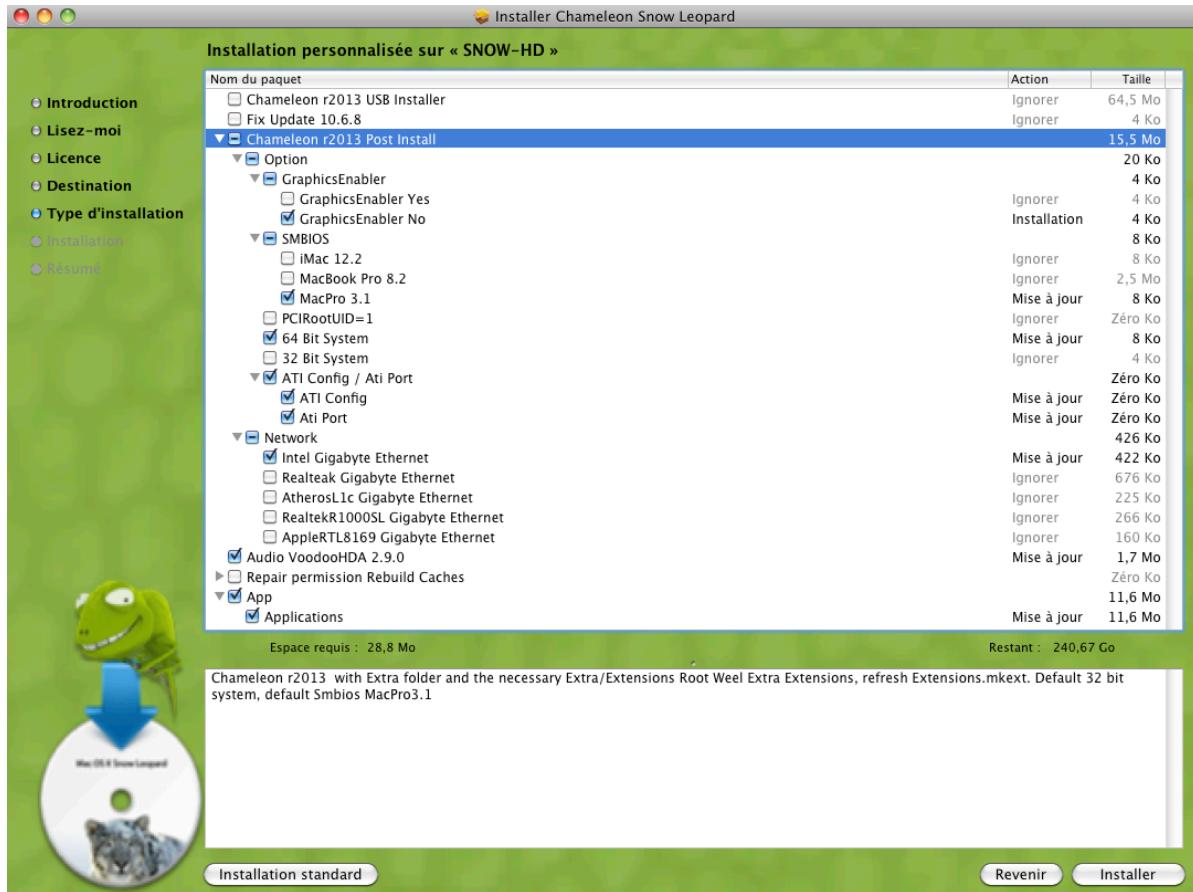

Dont Reboot !

**After installing Combo 10.6.8 , go to Apple Menue and select Force to quit**

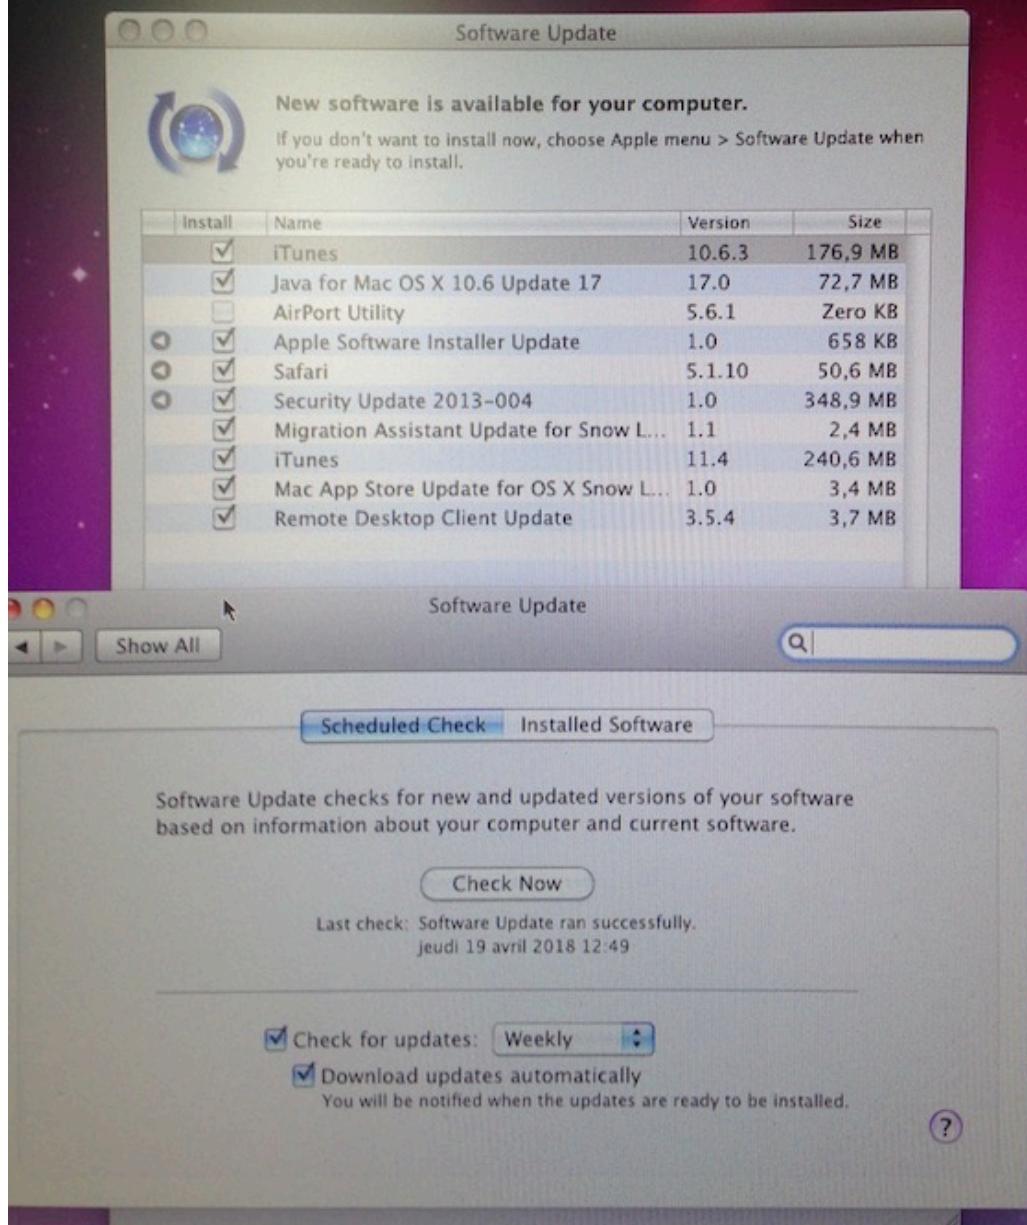

**Now complete Post Instalation  
( Here an exemple of my choices )**

**Reboot whit out USB , now the HD is Bootable !  
Complet the final Update**

## After Combo update you have to Complete Final Update

**Reboot again**

**Enjoy Mac OS X Snow Leopard 10.6.8 Chameleon  
r2013**
